

LEAD POISONING PREVENTION: DIRECTORY OF STATE CONTACTS 1997-1998

LEAD POISONING PREVENTION: DIRECTORY OF STATE CONTACTS 1997-1998

The Lead Poisoning Prevention: Directory of State Contacts 1997-1998 is compiled by the National Conference of State Legislators.

The Office of Lead Hazard Control appreciates the help of Doug Farquhar and Linda Tassin for their contribution to this CD-ROM.

The State Contacts directory can be ordered from NCSL by calling (303) 830-2200. The cost is \$20. When ordering, the State Contacts directory is item # 4674.

**LEAD POISONING PREVENTION
DIRECTORY OF STATE CONTACTS
1997-1998**

Linda Tassin and Doug Farquhar

Energy, Science and Natural Resources Program

National Conference of State Legislatures
William T. Pound, Executive Director

1560 Broadway, Suite 700
Denver, Colorado 80202-5140

444 North Capitol Street, N.W., Suite 515
Washington, D.C. 20001

August 1997

The National Conference of State Legislatures serves the legislators and staffs of the nation's 50 states, its commonwealths and territories.

NCSL was created in January 1975 from the merger of three organizations that served or represented state legislatures. NCSL is a bipartisan organization with three objectives:

- To improve the quality and effectiveness of state legislatures,
- To foster interstate communication and cooperation,
- To ensure states a strong, cohesive voice in the federal system.

The Conference has offices in Denver, Colorado, and Washington, D.C.

Lead Poisoning Prevention: Directory of State Contacts 1997-1998
is printed on recycled paper.

ACKNOWLEDGEMENTS

The *Lead Poisoning Prevention: Directory of State Contacts 1997-1998* identifies the main contacts for lead poisoning prevention in the health, environmental and occupational safety and health agencies in each state. Information for this directory came from contacts within state lead programs or from other sources confirmed by state lead contacts. We appreciate the time and effort given by everyone who assisted in the project. Production of this directory is part of a project to assist states in reducing lead hazards.

Special thanks to Doug Sacarto who provided computer support for this project and to Leann Stelzer for her editing suggestions.

NCSL greatly appreciates any updates or comments about the directory. Please write or call:

Lead Hazards Project
National Conference of State Legislatures
1560 Broadway, Suite 700

Even before passage of the Residential Lead-Based Paint Hazard Reduction Act (Title X) in 1992, states and territories have been active in regulating lead hazards. Maryland and Massachusetts passed comprehensive laws to address lead hazards in 1988; New York City banned lead-based paint in 1960. But Title X and its implementing regulations encouraged states and territories to adopt laws on training, certification and accreditation, screening, surveillance, disposal and other aspects of lead hazard reduction and lead poisoning prevention.

This directory is the fifth in a series that was first published in 1992. Since the first directory, contacts working on lead have doubled to well over 500 people working on lead-related issues in the states and territories. This directory identifies those contacts and their respective programs and activities. Twelve contact areas are identified for the various types of lead poisoning prevention and hazard control activities. Short summaries highlight other special features of programs, such as whether lead is a reportable disease, how a program handles abatement, environmental assessment and case management activities, and other activities.

Several tables have been created based on information received from the state contacts. Table 1 lists contacts for the various areas in each state and territory. Table 2 discusses activities, such as when lead screenings occur or tracking surveillance data. Table 3 presents the action levels for lead in paint, dust, soil and water from EPA, HUD and every state and territory. The fourth table (Appendix A) presents abatement information. The tables in appendices B, C, D and E describe the requirements for training and certification for each discipline in every state that has a program.

Every state, the District of Columbia and most of the territories have some lead activities. Governors' contacts are listed for 50 states and territories. In 45 states and territories a screening contact is listed, 47 have surveillance contacts and 44 identified a medical contact for lead poisoning. In 46 states a training, certification and accreditation contact has been listed, although only 33 states and the District of Columbia have enacted legislation requiring training and certification to perform lead hazard reduction work. Abatement contacts have been identified in 45 states and territories. An environmental contact has been listed for 36 states, a disposal contact for 31, and an occupational safety and health contact for 27.

INTRODUCTION

Program Categories and State and Territorial Activities on Lead Poisoning Prevention

The directory initially was compiled in January and February 1992. The 1997-1998 directory is based on a survey sent to each state or territorial contact in March 1997 requesting updates and additional data about programs. Comments and corrections received from the states and territories were incorporated into the final draft.

The survey included the program categories and questions described in this section. Each state or territorial contact was asked to mark the categories that best identify their official function and answer all questions related to that category. The term *state* includes territories in this report.

Governor's Contact identifies the person appointed by the governor to be the state's or territory's representative on lead issues to the U.S. Environmental Protection Agency (EPA). Questions regarding the development or structure of a state's lead program should be directed to this contact.

Abatement/Standards and Enforcement identifies the person responsible for any abatement activities and/or the development of abatement standards and the enforcement of those standards.

Training/Certification/Accreditation identifies the person who oversees or may receive the responsibility for training or certification of abatement professionals. Several states do not have such programs but have identified potential people or programs to handle such activities if or when they develop.

Medical Contact identifies the medical consultant for the state's lead prevention programs.

Screening identifies the person responsible for blood lead screening activities within the state.

Inspections identifies the person responsible for follow-up inspections for areas or buildings found to have high contents of lead.

INTRODUCTION

Laboratories identifies the person or director responsible for environmental lead sample analysis, such as soil, paint chip or building samples. It also identifies the person or director responsible for blood lead content analysis. Some state laboratories do not have these capabilities and send their samples to private labs or out of state. Some states require laboratories to report any elevated blood lead levels.

Surveillance identifies the person responsible for collecting and identifying individuals those who have elevated blood lead if lead is a reportable disease in the state.

Public Outreach identifies the person responsible for providing education and outreach about their program to the public and local health, educational and environmental agencies.

Environmental (General) identifies the main contact for environmental lead programs, either a program manager or director.

Disposal identifies the person responsible for any disposal or RCRA requirements regarding lead. Many states list lead as a regulated waste, but few have rules specifically dealing with lead.

Occupational Safety and Health identifies the person within the state OSHA responsible for any elevated blood lead in workers or any lead hazards in an occupational setting.

ALABAMA

Wade Pitchford, Director

Indoor Air Quality Lead Branch
RSA Tower, Suite 1250
Department of Public Health
P.O. Box 303017
Montgomery 36130-3017

(334) 206-5373

Fax: (334) 206-5788

*Governor's Contact, Abatement Standards and Enforcement, Inspections,
Public Outreach, Training/Certification/Accreditation*

Directs state lead environmental inspection activities, including the
Childhood Lead Poisoning Prevention Program's residential lead
assessment and inspection. Serves as the alternate governor's contact
for the state.

Dave Davis, Chief

Northern Section RCRA
Land Division
Department of Environmental Management
P.O. Box 301463
Montgomery 36130-1463

(334) 271-7737

Fax: (334) 279-3050

Disposal (RCRA)

Regulates the management of lead hazardous waste to include
treatment, storage, disposal and transportation, and responds to
citizens' complaints about lead hazards.

ALABAMA

Salvador Gray, Environmental Engineer**(334) 206-5373**

Division of Community Environmental Protection Fax: (334) 206-5788

Department of Public Health

RSA Tower, Suite 1250

P.O. Box 303017

Montgomery 36130-3017

*Abatement Standards and Enforcement, Environmental (General),
Inspections, Public Outreach, Training/Certification/Accreditation*

Responsible for providing environmental lead testing and risk assessment of elevated blood level in children's residences. Provides lead testing for HUD and multi-housing owners for low income housing tax incentive program. Develops policies and legislation for state lead programs. Provides consulting services for lead abatement and prevention. Also responsible for public education and awareness on lead.

Gary Jones, Deputy Director**(334) 206-5373**

Indoor Air Quality Lead Branch

Fax: (334) 206-5788

Department of Public Health

garywj@mail.wrldnet.net

RSA Tower, Suite 1250

P.O. Box 303017

Montgomery 36130-3017

Abatement Standards and Enforcement, Inspections, Public Outreach

Provides environmental lead testing and risk assessment of elevated blood level in children's residence. Provides lead testing for HUD and multi-housing owners for low-income housing tax incentive program.

ALABAMA

Russell Kelly, Chief

Solid Waste Branch, Land Division
Department of Environmental Management
P.O. Box 301463
Montgomery 36130-1463

(334) 271-7771
Fax: (334) 279-3050

Disposal (RCRA)

Responsible for state lead disposal, RCRA and nonhazardous solid wastes.

J.P. Lofgren, M.D., State Epidemiologist

Epidemiology
Department of Public Health
RSA Tower, Suite 1310
P.O. Box 303017
Montgomery 36130-3017

(334) 206-5971
Fax: (334) 206-5967
jpl1@wonder.em.cdc.gov

Medical Contact, Surveillance

Directs the entire epidemiology program, including the lead program. The state public health department requires reporting if blood lead levels in workers are over 15 µg/dL.

ALABAMA

Anic Lopez, Director/Coordinator**(334) 206-5675**

Childhood Lead Poisoning Prevention Program Fax: (334) 206-2983

Bureau of Family Health Services lope101w@wonder.em.cdc.gov

Department of Public Health

RSA Tower, Suite 1350

P.O. Box 303017

Montgomery 36130-3017

Public Outreach, Screening

The Alabama Childhood Lead Poisoning Prevention Project promotes the statewide screening of at-risk children six to 72 months of age. A blood lead level of 15 µg/dL is a reportable disease and is supported with medical and environmental case management and follow-up as needed. These support services are provided for all children identified with an elevated blood lead level the project is made aware of. The project provides outreach screening and education to prevent childhood lead poisoning.

David Sherrod, Chief**(334) 260-3400**

Lead Branch Fax: (334) 244-5083

Bureau of Clinical Laboratories

8140 University Drive

Montgomery 36130-3017

Laboratories

Supervises the analysis of blood and environmental samples for lead content.

*Abatement Standards and Enforcement, Environmental (General),
Inspections, Training/Certification/Accreditation*

Responsible for lead-safe work practice environmental standards and enforcement for state lead program. Administers primary prevention activities, including identifying sources of environmental lead exposure among children. Develops programs for reducing or (where possible) eliminating such exposures (particularly those associated with residential lead-based paint). Accredits lead-related construction training providers and certifies lead-related construction work personnel.

Ana Maria Osorio, M.D., Chief

Occupational Lead Poisoning Prevention
Department of Health Services
2151 Berkeley Way, Annex 11
Berkeley 94704

(510) 540-2115

Fax: (510) 540-3472

Occupational Safety and Health, Public Outreach, Surveillance

Administers Occupational Lead Poisoning Prevention Program, which provides surveillance, case follow-up, training and educational materials, technical assistance and intervention projects. Target audiences include workers in lead-using industries, those at risk from take-home lead exposure, employers, trade associations, health professionals and others interested in preventing work-related lead poisoning. There is no state mandated response level. The program currently conducts in-depth case management with workers, employers and physicians for blood lead levels greater than 60 µg/dL. For levels 40-59 µg/dL, the program provides educational information and responds to telephone calls. The program does not provide enforcement (state OSHA enforces program).

*Governor's Contact, Abatement Standards and Enforcement, Training/
Certification/Accreditation*

Regulations are being developed pursuant to R.S. 30:2351 Lead Hazard Reduction, Certification, and Licensure. This legislation includes standards for licensure, training, certification of individuals and accreditation of training providers. Also included are standards for abatement, worker protection, permitting of projects, public education and outreach, and enforcement authority.

Charles Anderson, Sanitarian Program Manager

Sanitarian Services
Office of Public Health
P.O. Box 60630, Room 210
New Orleans 70160

(504) 568-5181

Fax: (504) 568-8343

Inspections

Responsible for lead poisoning control and environmental inspection and enforcement in cases of lead poisoning of children and others deemed at risk under provisions of the Sanitary Code, State of Louisiana, Chapter IV.

Henry Bradford, Director of Laboratories

Office of Public Health
Department of Health and Hospitals
P.O. Box 60630, 7th Floor
New Orleans 70160-0630

(504) 568-5375

Fax: (504) 568-5393

Laboratories

Responsible for blood lead and environmental lead analyses.

LOUISIANA

Dianne Dugas, Director
Environmental Epidemiology
Department of Health and Hospitals
234 Loyola Avenue, Suite 620
Baton Rouge 70112

(504) 568-8537

Public Outreach, Training/Certification/Accreditation

Primarily responsible for education and outreach. Also coordinates certification, accreditation and training.

Eve Hartz Flood, R.N., MPH, Nurse Consultant
Genetics and Lead
Genetic Services Program
Office of Public Health
325 Loyola Avenue, Room 308
New Orleans 70112

(504) 568-7723
Fax: (504) 568-7722

Screening, Surveillance

Coordinates state lead program, which involves screening, environmental inspections and follow-up. Most activity is at parish level. No abatement programs at present, but state sanitary code has developed guidelines. Lead poisoning is a reportable disease. Program screens all children coming into child health clinics (aged six months to six years) those at high risk, and children living in same household as lead cases.

Public Outreach, Screening, Surveillance

MDCH Childhood Lead Poisoning Prevention Project (Childhood Lead Poisoning Prevention Program) is a statewide surveillance and primary prevention project that includes screening and follow-up of identified lead poisoned children and extensive public and professional education. The Childhood Lead Poisoning Prevention Program is expanding its primary prevention efforts by identifying and reducing lead hazards in older homes using specialized cleaning techniques and interim controls. The Childhood Lead Poisoning Prevention Program also identifies occupationally exposed adults in an effort to prevent "take home lead."

Disposal (RCRA)

Responsible for the regulatory development of the state lead waste disposal legislation, soil lead rules and other lead initiatives. Writes rules and legislation on proper disposal of residential lead waste. Monitors lead abatement and swab team cleanup to ensure that lead waste is properly contained, stored and disposed. Works with demolition and landfill operators to properly accept lead waste. Prepares and provides education materials and other information such as fact sheets and flow charts on lead waste disposal to abatement contractors, swab teams, trainers and the public on lead abatement. Lectures on lead abatement in universities and technical colleges.

Public Outreach, Screening

The state Childhood Lead Poisoning Prevention Program offers leadership and policy direction to 58 local health units and lead poisoning prevention programs. The state program supports the local programs with funding and technical assistance. The local programs are responsible for direct services for lead poisoning prevention, including lead screening, education, and case management of children with elevated lead levels.

Medical Contact, Public Outreach, Screening, Surveillance

Childhood Lead Poisoning Prevention program has been in operation since 1994; enabling legislation is in place and surveillance is being developed. To date, more than 20,000 children have been screened, approximately 5 percent of 0-six month-old population. Lead screening and surveillance activities currently are coordinated by the Oklahoma Childhood Lead Poisoning Prevention Program which also provides education and resources to the medical community, schools and the general public when necessary. Limited childhood blood lead screening is available to high-risk children through the state health department. Blood lead levels of 10 µg/dL are reportable.

Governor's Contact, Inspections, Public Outreach, Screening, Surveillance

Directs state and federally funded local Childhood Lead Poisoning Prevention Program projects. The program involves screening, follow-up, case management, environmental investigation, referral for treatment, community outreach, prevention and education and enforcement of local ordinances. Currently is implementing a HUD grant for reduction of lead-based paint hazards in homes of low-income families. Receives reports of elevated blood lead levels for individuals from birth through 15 years of age from laboratories approved to do testing by the state Department of Health. Refers children with venous blood lead levels greater than 15 µg/dL to the appropriate follow-up services. Performs data collection and surveillance. Disseminates information statewide to inform the public of the dangers of lead poisoning and ways to prevent it. Operates statewide toll-free lead information line.

Surveillance

Blood lead levels of 10 µg/dL or greater are reportable to the state
Department of Health Clinical laboratories are required to report
cases of elevated blood lead levels monthly. These data are used to
determine risk factors for lead poisoning and the need for further
follow-up. Children with confirmed elevations are referred for
environmental follow-up. Adults with blood lead levels of 25 µg/dL
or higher who are reported to the registry are contacted by staff.
Possible sources of lead exposure (both residential and occupational)
are explored with the person, who is given educational material on
ways to reduce exposure to lead.

Fax: (304) 558-2183

Public Outreach, Screening, Surveillance

Responsible for the development and implementation of lead screening program. This includes outlining screening protocol, defining follow-up procedures and coordinating with the Office of Environmental Health Services for environmental assessments. Coordinates reporting of all blood lead reported in the state.

Henry Anderson, Chief Medical Officer
Bureau of Public Health
1414 East Washington Avenue, Room 96
Madison 53703-3044

(608) 266-1253
Fax: (608) 267-4853

Governor's Contact, Medical Contact

Medical contact and principal investigator for the CDC lead poisoning prevention grant.

Richard Brandt, Chief Industrial Hygienist
Department of Commerce
401 Pilot Court C
Waukesha 53188

(414) 521-5187
Fax: (414) 548-8614

Occupational Safety and Health

Enforces state and federal OSHA regulations for public sector employees. Federal OSHA provides regulations for the private sector.

Terry Burk, Chemist Supervisor
Occupational Health Laboratory
Laboratory of Hygiene
979 Jonathan Drive
Madison 53713

(608) 263-8160
Fax: (608) 263-6551
tlburk@facstaff.wisc.edu

Laboratories

Responsible for conducting environmental lead analysis.

WISCONSIN

Mark Chamberlain, Environmental Health Specialist (608) 266-7897
Department of Health and Social Services Fax: (608) 267-4853
Bureau of Public Health
1414 East Washington Avenue, Room 96
Madison 53703-3044

Abatement Standards and Enforcement, Environmental (General)

Responsible for inspections, abatement guidelines and education of homeowners, enforcement of state lead health regulations, and coordination of enforcement activities within various state agencies. Provides technical assistance to homeowners, property owners associations, training organizations, trade organization and medical and public health professionals.

Margie Joosse Coons, Program Coordinator (608) 267-0473
Bureau of Public Health Fax: (608) 267-4853
1414 East Washington Avenue, Room 96 coon101w@cdc.gov
Madison 53703-3044

Public Outreach, Screening, Surveillance

CDC grant coordinator. Responsible for surveillance, screening and case management activities for the state. Under state law, all blood lead levels are reportable.

Susan LaFlash, Public Health Nurse (608)266-8176
Division of Health, Bureau of Public Health Fax: (608)267-4853
1414 East Washington Avenue, Room 132
Madison 53703

Public Outreach

Consultation and technical advise to local health departments in the area of childhood lead poisoning prevention and detection.

Perry Manor, Director

Asbestos/Lead Training and Certification
Department of Health and Social Services
1414 East Washington Avenue, Room 117
Madison 53703

DISTRICT OF COLUMBIA

Hampton Cross, Director

Environmental Regulation Administration
Department of Consumer and Regulatory Affairs
2100 Martin Luther King Avenue, S.E., Suite 203
Washington 20020-5732

(202) 727-7170

Fax: (202) 645-6622

Governor's Contact, Screening

The District's lead program is developing legislation and regulation for the certification of workers, accreditation of training programs, and standards and procedures for performing LBP activities. The program also is developing a district-wide strategy for lead poisoning prevention in cooperation with other district agencies. Also in progress is expansion and coordination of community outreach and education.

Ella L. Witherspoon, Chief

Childhood Lead Poisoning Prevention Program
Preventive Health Services Administration
Department of Health
717 14th Street, N.W., Suite 850
Washington 20005

(202) 727-9850

Fax: (202) 727-1971

Governor's Contact, Medical Contact, Public Outreach, Screening

Provides city-wide blood lead screening for children under six years old through door-to-door canvassing and in child care facilities. Educates community residents about the danger and prevention of lead poisoning. Identifies and ensures proper cleanup of lead hazards in the environment of lead poisoned children. Provides case management to ensure the prescribed medical follow-up for lead poisoned children by their health care providers.
